6,000,000₮+ jobs that fit your profile

Zangia.mn + Lambda.global + LinkedIn, scanned 2026-10-06 · prepared for Nasan-Ochir Sukhbaatar

What was scanned. All 7,581 active Zangia listings (via its search API) and every Lambda listing whose salary reaches 6M₮ (~85 jobs). 248 Zangia listings and ~85 Lambda listings reach 6M₮+, but almost all are mining, finance, construction, sales or executive roles.
Bottom line. Only **4 software/AI/data roles** actually pay 6M₮+ right now. Another 6 sit in the 5.5–6M₮ band (their top touches 6M). Local tech salaries mostly top out at 4–5.5M₮ on these boards, so the 6M+ tech market is thin and every listing below is worth a look.

1. PAYS 6M₮+

Senior AI Researcher (Ахлах AI судлаач), Data Office — Strong fit

6.0–6.5M₮

Khan Bank (ХААН Банк)

Deadline extended: 2026-10-16 · 42 applicants · zangia.mn/job/_cobpanhosj

- **They want:** LLM / SLM / generative and agentic AI, fine-tuning and AI apps; Python (pandas, scikit-learn, PyTorch) and SQL; STT/TTS and chatbots (bonus); lead a team; AI governance and data governance; 5 years in AI/data; CS/AI/stats degree.
- **Your match:** fine-tuned Mongolian voice model with emotion training (exactly their STT/TTS bonus), grounded LLM products, Open Parliament on official open data (governance angle), team lead (8 people), bank-app experience.
- **Gaps:** 5 years of dedicated AI work (yours is about 1–2 years plus 8 years of engineering); no certificates. **Action:** apply now through Khan Bank's form; lead with the speech model and banking background.

People Analytics Manager — Partial fit

6.0–6.5M₮

Unitel Group (Юнител)

Deadline 2026-10-25 (Zangia) / 2026-10-31 (Lambda) · 34 + 13 applicants · zangia.mn/job/_qujez68qyw · lambda.global

- **They want:** data-driven HR analytics; SQL, Python/R, Power BI, Excel; statistics, predictive analytics, data modelling; 5+ years in data analytics / BI / people analytics; advanced English.
- **Your match:** Python, SQL, data pipelines and evaluation work. **Gap:** no BI / HR analytics background or Power BI on the CV. Worth applying only if an analytics-leaning role appeals to you.

IT Engineer in Japan (full-time employee) — Fit if relocating

6.0–6.5M₮

CAL (Japanese IT firm, Mongolia office)

Two postings: deadline 2026-10-10 (_dtbdyjcp9a, 13 applicants) and 2026-10-16 (_x2kvc0vzqh, with a Japanese-language course, 39 applicants)

- **They want:** IT degree; web and open-system development, any language; requirements, design, coding and testing. The direct-hire posting needs **Japanese N2**; the course posting accepts basic Japanese.
- **Your match:** your technical level is well above the bar. **The real question:** whether you want to move to Japan, and your Japanese level.

2. TOP OF RANGE REACHES 6M₮ (5.5–6M₮)

Chief Development Engineer (Хөгжүүлэлтийн ерөнхий инженер) — Strong fit

5.5–6.0M₮

Data Bank (Дата Бэйнк)

Deadline 2026-10-08 (2 days) · 19 applicants · zangia.mn/job/_9ce2zskg8g

- **They want:** 6+ years in software development; turn requirements into code; AI development and effective use of AI tools; **Go**; English; independent technical research.
- **Your match:** 8+ years, AI development, multi-agent coding workflows. **Gap:** Go isn't on your CV. If you've used it, say so; if not, mention you pick up languages quickly (Dart, TS, Rust, Python).

IT Senior Manager (Мэдээллийн технологийн ахлах менежер) Partial fit

5.5–6.0M₮

Shunkhlai LLC (Шунхлай), petroleum

Deadline 2026-11-08 · 13 applicants · lambda.global

- **They want:** lead all company IT systems and infrastructure; ERP, servers, networks, security, SQL, cloud, IT budget, IT team management, backup/DR, Windows/Linux, VMware/Hyper-V, ITIL.
- **Your match:** team leadership and Shunkhlai context (you built their AI training program and worked on their apps). **Gap:** this is an IT operations and infrastructure management role, not software development.

BSS (Business Support System) Engineer Partial fit

5.5–6.0M₮

Huawei Technologies

Deadline 2026-11-01 · 12 applicants · zangia.mn/job/_mo066eep9y

- **They want:** delivery and operations of telecom billing/BSS software; Linux, networks, Python/shell, MySQL/Oracle, automation, troubleshooting; 2+ years in system implementation and operations; good English.
- **Your match:** Python, Linux, PostgreSQL, payments and billing-adjacent work. **Gap:** it's an operations and maintenance role, more junior than your level.

Data Analyst (business and product analytics) Weak fit

5.5–6.0M₮

Ochir Undraa OMZ NBFI

Deadline 2026-11-09 · 30 applicants · lambda.global

- SQL, advanced Excel, Power BI, Python/R, dashboards, statistics, ETL, finance knowledge. A BI analyst role, a step sideways from engineering.

Also in the 5.5–6M₮ band, poor fit	Why not
Khan Bank: Infrastructure Engineer, enterprise platform (_3vgbw95t80, deadline 11-04)	Data-center networking (CCNA/CCNP, firewalls, VMware), 24/7 on-call
Ochir Undraa: Senior Product Owner (_v9swk5pnc4, deadline 10-23)	Needs 8+ years in bank/NBFI credit product development
Amjilt Cyber: "Director of Product Development" (_9p2jllcp9x)	Actually a school-branch executive director role in education

3. LINKEDIN (SCANNED 2026-10-06)

LinkedIn has very few Mongolia listings: 62 in the past month, mostly mining, NGO and finance. I also checked 461 remote AI, LLM, speech, Flutter, React Native and full-stack listings across Asia-Pacific and worldwide. Almost all are tied to one country (India, the US, Canada, the UK) and say so in the description. None explicitly accepts applicants in Mongolia except the company below. LinkedIn rarely shows salaries; for reference, 6M₮ is about $1,750/month.

Senior Software Engineer / Senior Full-Stack Product Engineer Strong fit

Not listed

The Flex / Base360.ai (UK short-term rental operator, AI operating system for property managers)

Posted 2026-09-23, location "Mongolia" on LinkedIn · Senior Software Engineer · Senior Full-Stack Product Engineer · also Product Engineer

- **They want:** to own products end to end: APIs, event-driven automations, and LLM/AI-agent features (guest messaging, maintenance triage, pricing), plus integrations with Airbnb, Stripe, Twilio and OpenAI.
- **Their stack:** Python, FastAPI, React, TypeScript, Supabase, PostgreSQL, AWS serverless, OpenAI APIs, Stripe, Docker, GitHub Actions.
- **Your match:** very close to your own products (astro.mn, gadaad.mn: Next.js + Supabase + LLMs + payments), grounded-LLM work, and payments/QPay integrations. A UK company hiring in Mongolia almost certainly pays well above 6M₮, but ask before investing time. **Action:** apply to the Senior Full-Stack Product Engineer role first.

4. SUGGESTED ORDER

1. **The Flex / Base360.ai** (LinkedIn): the closest stack match of everything found; apply this week.
2. **Data Bank, today or tomorrow** (closes 10-08). Strongest dev fit; address Go up front.
3. **Khan Bank AI Researcher** by 10-16. Best overall match for where your CV is heading.
4. Decide on **Japan (CAL)**; the first posting closes 10-10.
5. Optional: **Unitel** (10-25), **Shunkhlai IT Senior Manager** (11-08), **Huawei** (11-01).

Just below the cut (5.0–5.5M₮) and a close fit if 6M₮ is flexible: Senior Back-end Developer at SteppeLink Holding (Python, Kubernetes, AI), ERP Developer at Monnider, Senior Back-end Developer at Zero Technology. Salaries are what employers posted; Zangia uses 500k bands. "Applicants" is the count shown on the board today.
